

YOHANN BETHOULE

Freelance Developer - Golang & Typescript

+33 6 12 31 25 54 yohann.bethoule@gmail.com https://yohannbethoule.com/ Nantes, France

EXPERIENCE

Full-stack developer consultant

Limougeotte

Since november 2026

Technos Strapi, Next.js

I support Limougeotte as a freelancer on the evolution and improvement of their Strapi backend and their Next.js back-office. My various missions include:

- Upgrading Strapi to v5
- Developing an ETL for ingesting data from an external API
- Setting up technical documentation across the various projects
- Securing and backing up persistent data

Full-stack web developer

Figaro Classifieds

06/2022 - 10/2025

Nantes, France

Technos Go, Next.js, Elasticsearch, PostgreSQL, Kubernetes, Jenkins, GCP

Maintenance and evolution of microservices used for deploying real estate sales and rental websites.

Within a team of 2 developers, 1 product owner, 1 designer, and 1 SEO expert, I took on the responsibilities of back-end lead developer for the Golang stack.

In a cloud environment on GCP with a microservices architecture, we worked in collaboration with other teams in the real estate business unit to develop the APIs, ETLs, websites, and other services enabling the publication of property listings across the various brands owned by Figaro Classifieds (Figaro Immobilier, Figaro Immeuble, Achat Terrain, and Propriétés le Figaro).

My various missions included:

- Developing new features on Figaro Immeuble: integrating data from partner APIs, SEO optimization, UI/UX improvements, etc.
- Setting up and evolving our internal analytics system: leveraging GCP tools to ensure real-time data reliability (Pub/Sub, Cloud Functions, BigQuery)
- Paying down technical debt on legacy projects: full rewrites of projects in Golang, Elasticsearch version upgrades, refactoring following DDD and clean code principles, etc.
- Training and upskilling teams on technical topics, mainly on Golang and Clean Code

Application Development Mentor - JavaScript React

OpenClassrooms

06/2023 - 08/2024

As an application development mentor at OpenClassrooms, I supported students throughout their degree program in JavaScript and React. I guided them in their self-paced learning, answered their questions, and shared my knowledge of web development best practices.

Full-stack web developer

ITEA (Informatique Télématique Atlantique)

06/2021 - 06/2022

Nantes, France

Technos PHP5, SQL, AngularJS, Vue.JS, Bootstrap

I contributed to the development and improvement of a management solution tailored to the needs of tourism reservation centers, ensuring it met the specific requirements of the sector

Full-stack web developer

Intellia France

11/2020 - 06/2021

Nantes, France

Technos ASP.NET, jQuery, Bootstrap, SQL server

I worked as a full-stack developer (back-end oriented) in a digital agency. We mainly developed ERP solutions for public organizations, including several intranets.

ABOUT ME

Full-stack developer specializing in Go and TypeScript, I have been working as an independent consultant since January 2026. I provide development services, team reinforcement, and technical training on Go.
